**Vessel dressing section of works part of an overall £18m contract to assist in the planning, fabrication of process piping and associated steelworks & Install as part of Valero Pembroke Refinery Alkylation plant Turnaround 2021.**

**Works section comprised of circa,  
8,000 fabrication mhrs  
12,000 installation mhrs  
All completed within a 2 month window through all weathers**

**Both vessels were dressed to relieve the installation risk to the biggest event the refinery has held – 2021 Turnaround This event involved 9months of planning assistance to the refinery team.**

**40,000 mhrs of process pipework fabrication and a planned 95,000 mhr installation window.**

**With significant scope growth (circa 80%) during the event this ended with 172,000 mhrs exhausted and a 2.5 week over-run.**
