

Fusion Industry SCHOOL

UK Atomic
Energy
Authority

A 2-week programme delivered by world-leading experts in fusion and related fields.

The Fusion Centre for Doctoral Training and UK Atomic Energy Authority (UKAEA) have worked with the fusion community to create this highly rated programme aimed at industry professionals. You should finish the course with a broad understanding of the fusion landscape and the challenges that remain to be solved.

The school consists of lectures, networking sessions, panel discussions and Q&As as well as visits to UKAEA's fusion facilities in the second week.

"Everyone working in fusion knows about their area, but can't easily see the whole picture. Fusion Industry School demystifies and opens doors to allow for the bigger picture understanding."

Laura Hirschfield, Optima Systems Consultancy.

"It was inspiring to see first-hand the collaboration across borders and industries to solve such a complex and stimulating challenge for the betterment of humanity"
Peter Walker, Altrad Babcock

YORK

17th - 20th June 2024

Focus on fusion science and technology

OXFORDSHIRE

30th Sept - 3rd October 2024

Focus on engineering applications
