

NUVIA GROUP

NIA INTERNATIONAL GROUP

Pete Roberts, Account Director, New Build
October 2026

Supporting your energy

01

NUVIA the nuclear
engineering specialist
within VINCI Group

01

A STRUCTURED PORTFOLIO

Core services across the NUVIA group

SERVICES

A range of high expertise technical activities to support clients from strategy to operations

PROJECTS

Delivering projects successfully across the full lifecycle from design to decommissioning

PRODUCTS

Dedicated product brands delivering state-of-the-art measurement technologies

02 LEADING PROVIDER OF HEALTH PHYSICS

Delivering Certainty in Safe Nuclear Operations

We are responsive, expert and highly skilled

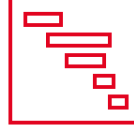

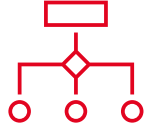

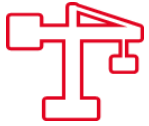

300+

HP specialists
across the UK

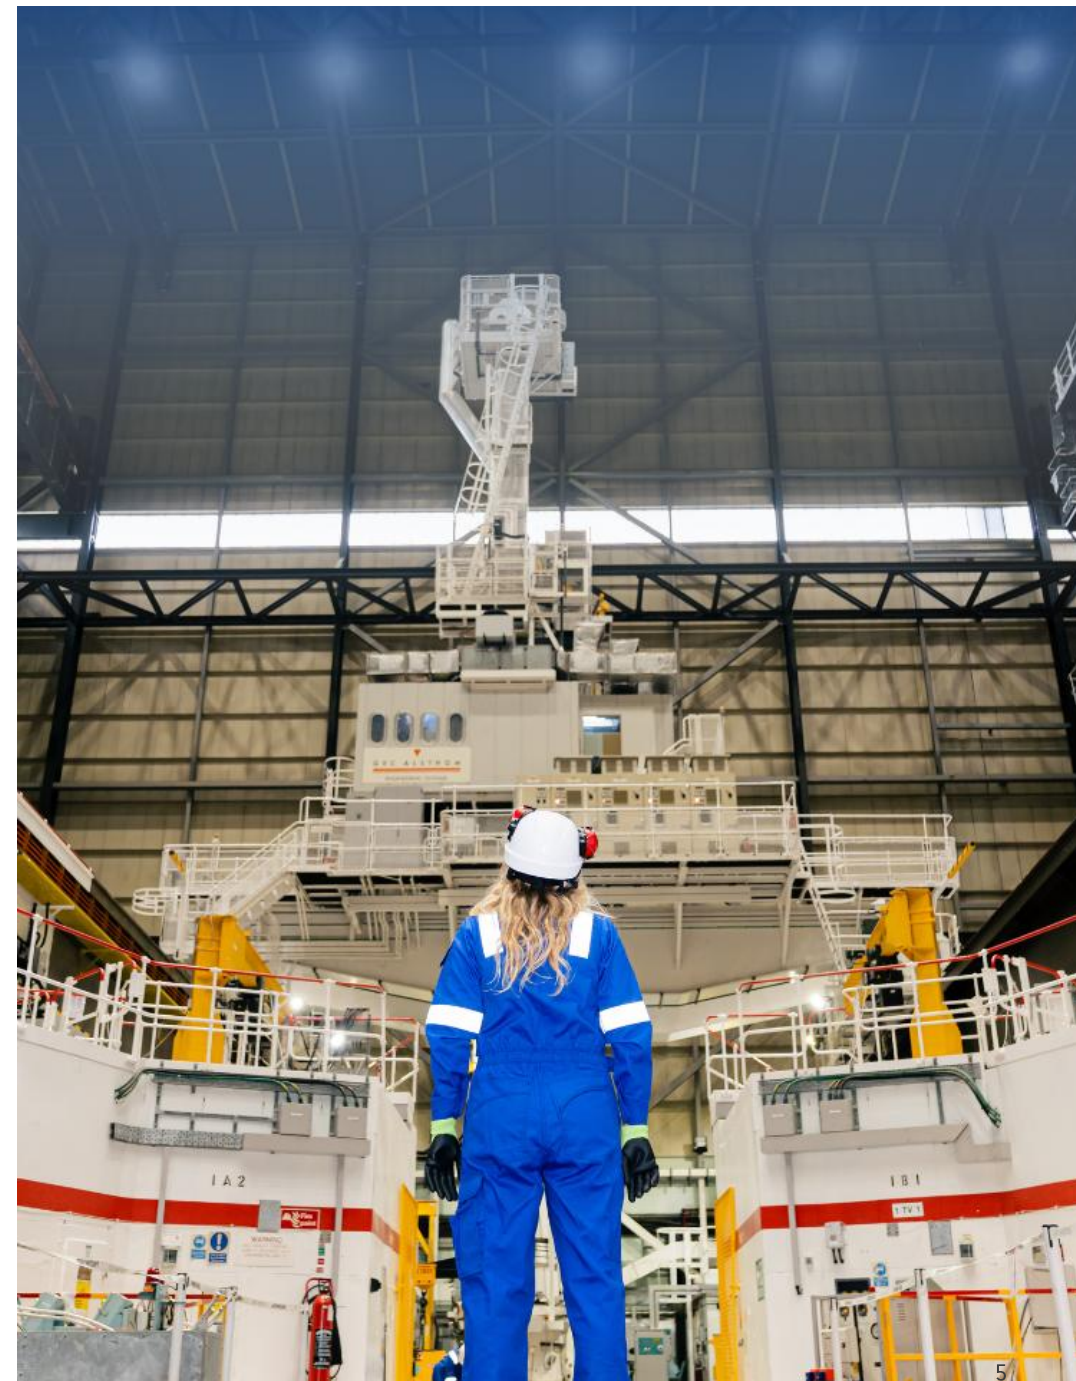

03 A TRUSTED PARTNER FOR COMPLEX PROJECT DELIVERY

- Multi-disciplinary engineering design services
- Full life cycle engineering project management
- Decommissioning and site services
- Technical Services & Consulting

Client Highlights:

1. Sellafield - Long-standing decommissioning partner
2. AWE - 20+ years supporting complex, high-hazard decommissioning
3. NRS - Decommissioning & Asbestos Removal Framework
4. GBE-N - Professional Advisory Services

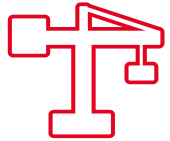

04

ILIOS CONSTRUCTION PARTNER FOR STEP FUSION

The UK's prototype fusion energy plant

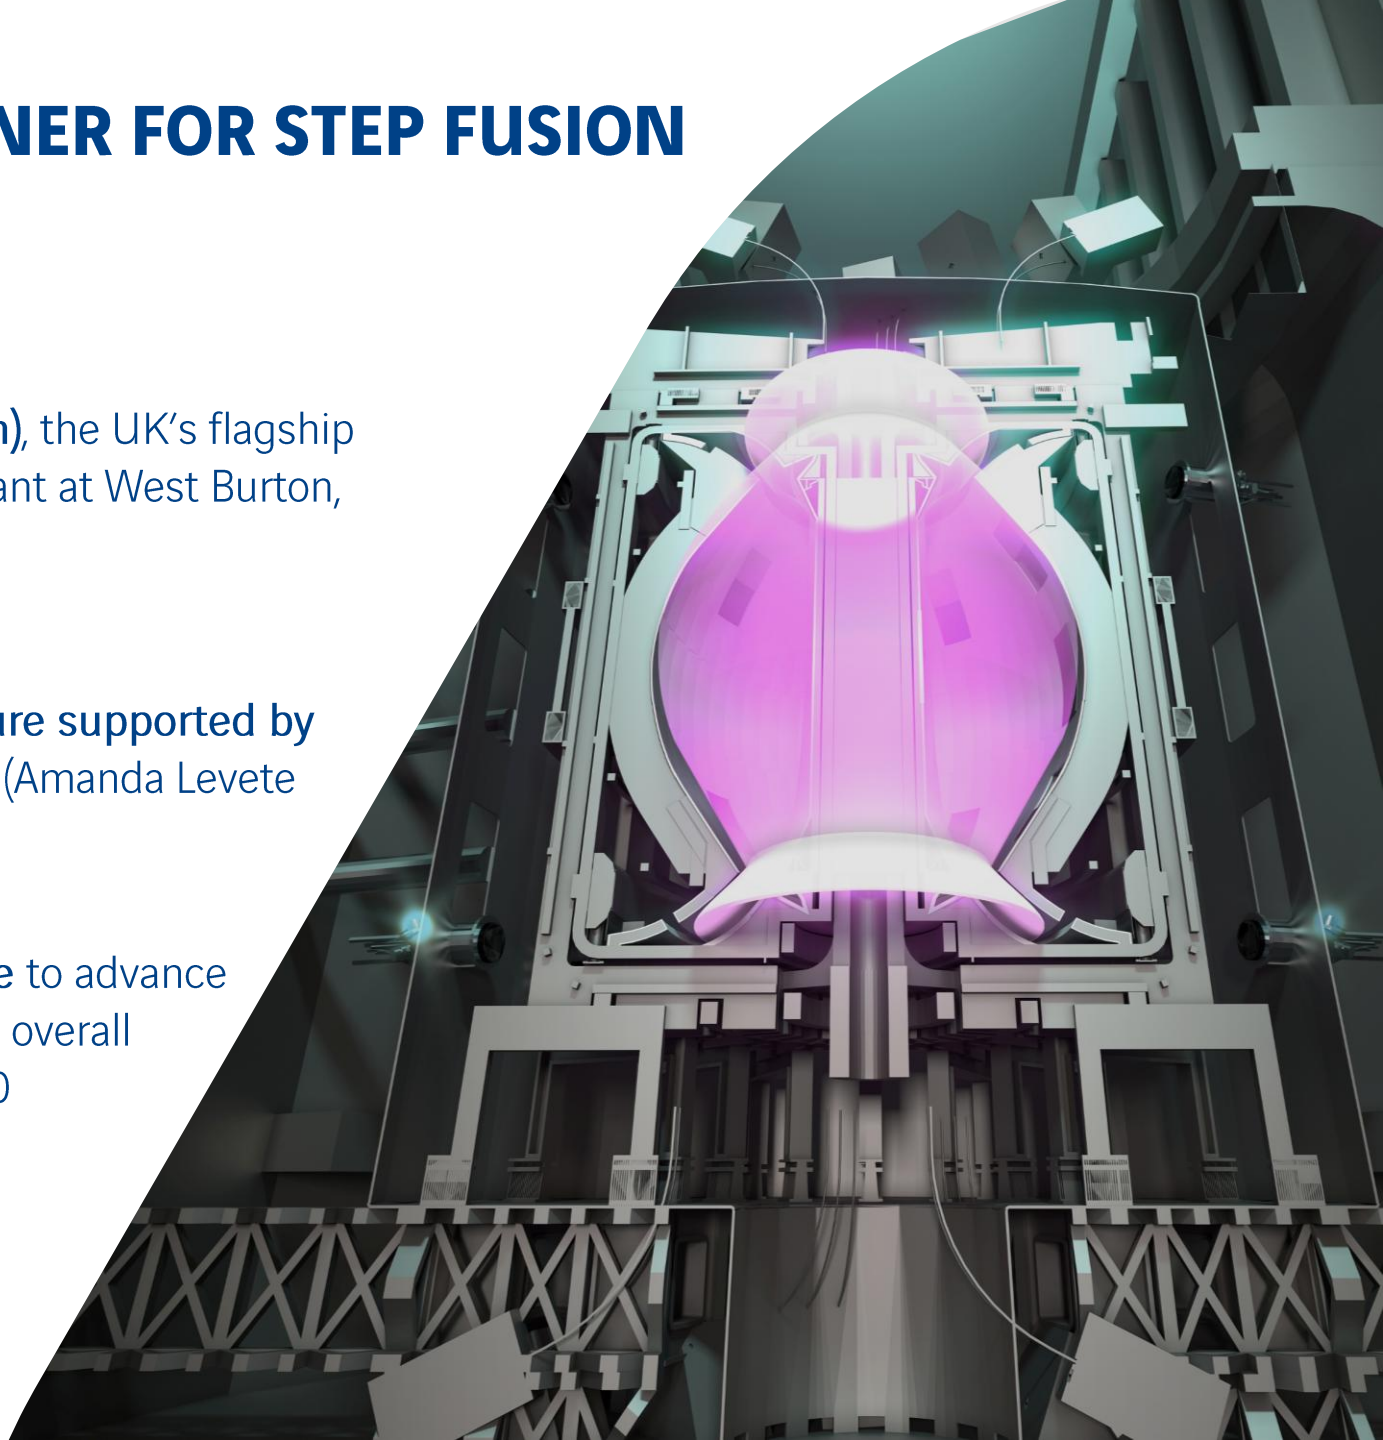

STEP (Spherical Tokamak for Energy Production), the UK's flagship programme to deliver a prototype fusion powerplant at West Burton, Nottinghamshire.

NUVIA and Kier comprise the Ilios Joint Venture supported by AECOM, Turner & Townsend, and architects AL_A (Amanda Levete Architects)

Contract award of £200 million for first tranche to advance the project from planning to physical delivery. The overall programme will lead to planned operation in 2040

05

DEFENCE

A highly valued partner for critical programme delivery

Nuclear Technical Support Provider (NTSP)

- 1 of 3 providers selected in 2020 by Defence Infrastructure Organisation
- Specialist nuclear technical services to support a range of defence entities
- Multiple projects supporting programmes aimed to achieve Clyde 2070 Programme supporting UK Continuous At Sea Deterrent
- Major long-term programme for upgrading facilities £250-400m
- Senior staff embedded within delivery agency and technical authorities fulfilling mission critical roles within NTSP

06

INDUSTRIAL SERVICES

Provision of specialist Industrial Services for building; maintaining and extending complex assets

Delivering Industrial Services and unique products into the Civil and Defence nuclear estate

Passive Fire Protection

Products includes:

- Penetration sealing
- Cable tray wrapping
- HVAC wrapping
- Electrical cabinet protection
- Cable boxes
- Structural protection

Mechanical and Electrical Installation

Services include:

- Installation, maintenance, repair
- HVAC
- EC&I
- Piping

Scaffolding and Access

Services include:

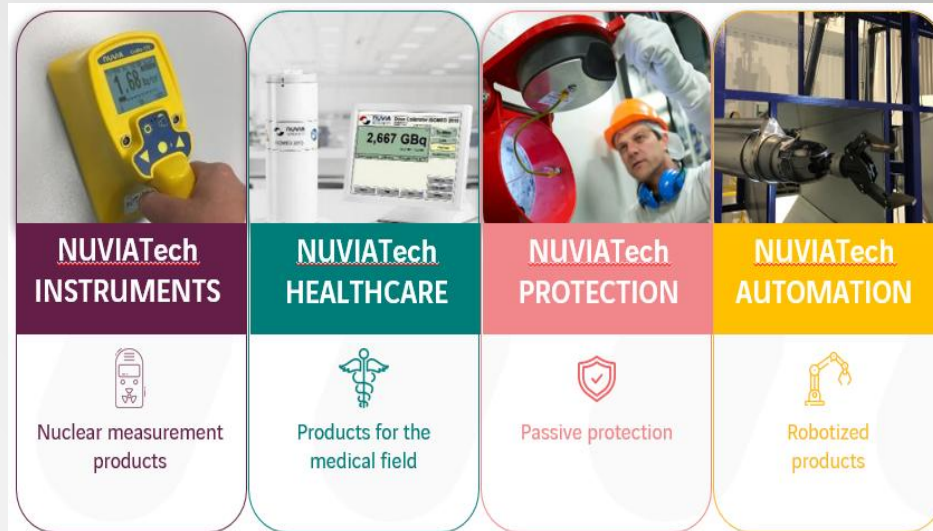

- Scaffolding design
- Scaffold erection and modification
- Scaffold dismantling
- Temporary works design

Products

Supplier of components (detectors, analysers and software) and complete measurement systems.

Innovation

Delivering innovative and cost-effective solutions to some of the most complex challenges in the industry

Combining our nuclear expertise, entrepreneurial spirit and client focus to supply innovative solutions.

- Adopting technology innovations from horizon scanning and collaborative partners
- Adapting technologies to work in the nuclear context
- Combining nuclear expertise, entrepreneurial spirit and client focus to deliver solutions.

02

VINCI GROUP CONTEXT

A world leader in concessions, energy solutions and construction, operating in more than 120 countries, shaped by **structural megatrends** that are durably impacting the global the market and will continue to drive its business over the long term

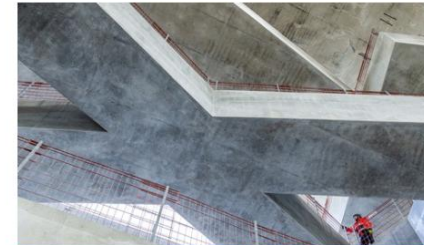

CONCESSIONS

**Mobility infrastructure
concessions**

ENERGY SOLUTIONS

**Energy infrastructure
solutions**

CONSTRUCTION

**Infrastructure
construction**

Sovereignty

Urbanisation

Energy transition

Digital revolution and AI

Mobility

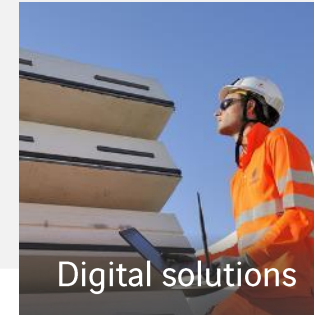

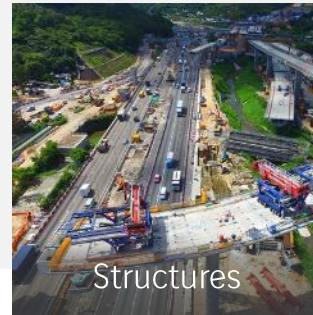

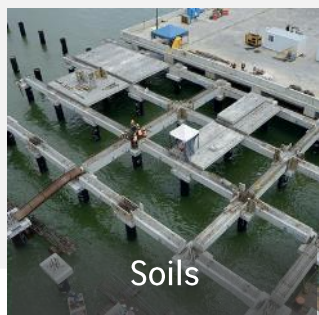

Environmental transition

02 SPECIALITY NETWORKS WITHIN VINCI CONSTRUCTION

Soletanche Freyssinet is world leader in soil, structural and nuclear engineering

SPECIALTY NETWORKS

NUVIA GROWTH

Global footprint

04 FINAL POINTS

- NUVIA is the nuclear engineering specialist within VINCI Group operating across a wide range of international markets
- The group operates a federated structure, with increasing level of collaboration
- NUVIA deliver a portfolio of Products, Projects and Services for clients in Nuclear, Defence and Fusion
- Health Physics, Industrial Services and the ability to execute complex engineering projects across the lifecycle underpins the NUVIA proposition
- The demand for capability and capacity across international nuclear, fusion and defence programmes is immense
- Collectively and collaboratively, we have a responsibility to deliver on behalf of our governments, clients and citizens

Thank you Merci
