WELCOME

It's a great pleasure to welcome you all to our joint Nuclear Institute/ Nuclear Industry Association Annual Dinner for 2026. We were once again overwhelmed with demand and this was the fastest selling dinner ever, with tickets sold out just weeks after going on sale!

I must begin by recognising the outstanding contribution of my predecessor, Fiona Rayment, who provided clear leadership through a period of growth and change for the Nuclear Institute and who was deservedly made a Dame in the 2026 King's New Year Honours List for her tremendous services to nuclear engineering. I'm sure that you all join me and everyone at the Nuclear Institute in congratulating Dame Fiona.

As the professional membership body dedicated to nuclear, the Nuclear Institute now represents around 6000 people in the industry and we're growing all the time. Membership is supported by strong engagement from both individuals and organisations. Company membership now represents over half of our total membership base, reflecting the value employers place on professional development and standards across the workforce.

A major focus this year has been the continued development, visibility and implementation of the Nuclear Professionalism Standard (NPS)®. This work underpins our long-term ambition to set clear expectations for professional behaviour, competence and leadership across the sector – all of which were highlighted as crucial factors in the work of the Nuclear Regulatory Review. It also supports our future plans for chartership and enhanced professional recognition. We were delighted to sign an MOU with the Nuclear Sector Skills Team recently, further strengthening the importance of the NPS in the UK skills landscape.

Across conferences, lectures and regional activities, we have brought together thousands of professionals to share knowledge and build connections. The scale and quality of delivery continues to improve, supported by better use of digital tools and more inclusive event design.

We have also strengthened our role in national conversations. Engagement with government, regulators and industry leaders has increased, with the Nuclear Institute contributing to discussions on skills, regulation and the future workforce. The UK nuclear sector requires tens of thousands of new skilled workers by 2030, and the Nuclear Institute is playing a central role in supporting the development of the future nuclear workforce.

Looking ahead, the priorities are clear. We will continue to expand professional recognition, strengthen our membership offer and ensure that the Nuclear Institute remains at the centre of the nuclear community.

Thank you to our members, volunteers, trustees and staff who make the Nuclear Institute the community we are proud to represent.

If you haven't already, then please join us as a member and work with us to enable a stronger nuclear community with nuclear professionalism at our core. Enjoy your evening.

Professor Adrian Bull MBE HonFNucI
President, Nuclear Institute

As we return for our annual dinner once again, it is important to reflect on the past year and the significant progress the civil nuclear industry has made across the UK. Major projects are moving forward, there are new opportunities for British businesses, and our industrial capability is growing at pace. There is a real sense of momentum across the sector, with the Government providing the certainty industry has long been seeking and businesses across the UK are delivering the expertise, investment and commitment needed to turn ambition into reality.

One of the most important signs of this progress is the growth of our workforce. For the first time in our sector's history, we have surpassed 100,000 jobs. This is a 67% increase over the past five years, from 61,371 jobs in 2021 to a record 102,606 in 2026. We must continue to champion that these jobs are highly skilled, well-paid jobs supporting communities across the UK, 86% of which are outside of London and the South East.

We have also seen critical progress across our new build programme. Construction at Hinkley Point C continues to advance, supporting thousands of jobs and businesses across the UK. At Sizewell C, the move into construction marks another major step towards delivering the UK's new fleet of nuclear power stations.

This year the development of Gwyndod, Europe's first small modular reactor project, has reinforced the focus of both the Government and industry to ensure the UK leads in SMR manufacturing. The launch of the Supplier Programme marks an important step in turning UK businesses ambition into opportunities, with the project offering the chance to compete for up to £1.4 billion in contracts over the coming year. This will support Great British Energy – Nuclear and Rolls-Royce SMR's goal to achieve more than 70% UK content across the fleet, ensuring British businesses are at the heart of its delivery.

The good work continues across the wider nuclear lifecycle. The decommissioning supply chain is carrying out vital work to reduce some of the UK's most complex nuclear hazards, manage waste safely and restore sites for future use. In fusion, the new national strategy and continued advances in research are helping to maintain the UK's position at the forefront of this emerging industry. Investment in nuclear fuels and manufacturing is also strengthening the foundations needed to support a growing domestic and international programme.

Looking ahead to 2027, the industry must pull together to champion the full implementation of the Nuclear Regulation Bill. The Government's commitment to implement the 47 recommendations, led by John Fingleton, is crucial to ensuring the UK can unlock the next phase of its nuclear renaissance. The upcoming Bill translates the recommendations into practical, efficient, and proportionate changes that will cut costs and build times.

We have an enormous opportunity to shape the future of our industry. We must maintain the pace, urgency, and focus that have brought us this far. Tonight is an opportunity to recognise the achievements of the past year, celebrate the people and businesses driving our industry forward, and look ahead to what we will accomplish together.

Thank you for everything you do for the UK nuclear industry.
I hope you enjoy what always is an unforgettable evening.

Lord Iain McNicol
Chair, Nuclear Industy Association

framatome

Now's the time.

The nuclear energy renaissance is here. Now's the time to ensure your plant's safe long-term operation and optimize your nuclear future. We're leveraging our worldwide experience, cutting-edge technologies and innovative solutions to help you optimize your plant performance and economics.

Learn more about our long-term operation solutions.

Longer fuel cycles, I&C modernization, aging management and license renewal support are a few of the many ways we'll help extend your reactor's operating lifetime while unleashing its full potential. Together, we can achieve energy security and energy independence. Now's the time.

Count on it.

Your Nuclear Equipment Delivery Partner.

*2026 Mechanical Engineering Graduates Marcell, Amaan, Fern, Waleed.

amentum

Advancing Nuclear Deployment

When demand has never been so high. When so much is a stake. When ever assurance is required.

Amentum brings deep nuclear intelligence, a proven delivery track record and global expertise to simplify the path to deployment.

SILENT AUCTION

This year the Annual Dinner is supporting the fantastic work of Pancreatic Cancer UK.

Right now, half of people with pancreatic cancer die within three months of diagnosis. Families are left with only hope to hold onto. Pancreatic Cancer UK brings more change through campaigning, more breakthroughs through research and more support through expert nurses.

As part of our fundraising efforts we're running a silent auction and raffle for this year's event, offering some exciting items to bid for and a range of fantastic prizes to be won.

Bidding, tickets and donation links are open now, just scan the QR code to view what's on offer and help bring us closer to a future where more lives can be saved.

A huge thank you to all of our generous donors for supporting this fundraising initiative and helping us make a difference.

Make your bid today, buy your tickets, and donate to support a life-saving cause. You could be one of our lucky winners! Every ticket counts, every donation matters and together we can help save lives.

Supporting

Pancreatic CANCER UK

Here are just some of the fantastic items and experiences on offer!

Manchester United – Matchday Hospitality for Four

An Apple iPad

Pair of top priced tickets for Wales v England – Six Nations Rugby

Afternoon Tea at The Grosvenor

Sale Sharks Rugby – VIP Hospitality Experience for Five

Engineering a better future for our planet and its people

We deliver innovative engineering solutions on nuclear projects across the globe helping our clients throughout the nuclear lifecycle, so that households, businesses and our communities around the world can benefit from safe, reliable and clean nuclear power for generations to come.

- New build
- Operations & maintenance
- Decommissioning
- Waste management
- Design & innovation
- Life extension

MORGAN SINDALL
INFRASTRUCTURE

Bringing purpose to project delivery

We're specialists in programme, design, construction, and engineering.

INFRASTRUCTURE | NEW BUILD | FUEL | DECOMMISSIONING | DEFENCE

Our breadth of capability and cross-sector experience in delivering complex infrastructure of national importance is matched with a steadfast commitment to delivering for the communities in which we work.

Collaborating closely with our clients, partners and supply chain family we harness modern methods of construction, drive sustainability and deliver meaningful social value that leaves a positive long-term legacy.

Scan to find out more about how we are redefining the delivery of major infrastructure programmes in the UK and the opportunities to work with us.

morgansindallinfrastructure.com

iti Group

Independent systems integrator safeguarding critical nuclear infrastructure for 50+ years.

WHAT WE CAN DO

- Safety and control systems
- Process control systems
- Real-time information and monitoring systems
- Radiological surveillance and emergency plume gamma monitoring
- Design, manufacture, test and install for nuclear new build
- Integrated control and safety systems
- Simulation solutions and digital twins
- Obsolescence upgrades
- Specialist control systems for cranes and handling equipment

PEOPLE ACROSS THE UK SUPPLY CHAIN

JOIN THE NIA

Nuclear Industry Association

The NIA is a highly effective advocate, providing a dynamic and credible voice for its members. Whether your business is solely based in nuclear, includes it as part of your services, or you are looking at joining the sector, there are many ways NIA membership can benefit your company goals.

Membership gives you...

Networking opportunities

Through our business group programme and events NIA brings together the whole industry, allowing members to exchange ideas, discover opportunities and feed into important policies.

Promotion to industry

We offer a range of promotional benefits to members through the NIA quarterly magazine Industry Link, our website Hub, weekly e-newsletters and exclusive online Member Directory.

A voice for industry

NIA is the voice of industry in Westminster and the media. We advocate for all parts of the sector, from existing operations to new build, the supply chain and decommissioning, we've got it covered.

MEMBERSHIP@NIAUK.ORG

MAJOR INFRASTRUCTURE SOLUTIONS

WHAT WE DO

COORDINATED SUPPLY FOR COMPLEX PROGRAMMES

Major infrastructure projects bring together multiple sites, contractors, product requirements and delivery schedules.

We coordinate products, stock and practical support around your programme, from everyday procurement and large call-off orders to on-site services and planned delivery.

By connecting local branches with our wider national resources, we help make essential products easier for your teams to access throughout the project.

WHY CHOOSE US?

- **COORDINATE PROJECT SUPPLY**
- **HOLD STOCK AROUND YOUR PROGRAMME**
- **SIMPLIFY EVERYDAY PROCUREMENT**
- **BRING SUPPORT CLOSER TO SITE**
- **SUPPORT SPECIALIST REQUIREMENTS**
- **CONNECT LOCAL AND NATIONAL SUPPORT**
